Everywhere Tables

Versatile enough to be used everywhere

Everywhere Tables

Designed by Dan Grabowski

Elegant and versatile, Everywhere Tables is a family of meeting, standing height, training, cafe and occasional tables, all sharing a simplicity designed to minimise the visual chaos in an active space. With a choice of sizes, shapes, heights, bases and finishes, including power options, the tables bring a sense of calm and order to any environment, regardless of the configuration.

Made for Meetings

Meetings flow better when everyone's needs are covered. Use oval table tops to ensure no one feels left out, or gather round a tapered video-conference table to make sure everyone in the room is visible. Whether you need a large table for a team meeting, or something smaller, there is an Everywhere Table to suit.

Learning Made Easy

Use Everywhere Tables to create dynamic training spaces. Rectangular, trapezoidal and curved tops provide the variety and flexibility to make settings which support different types of learning. Create formal classrooms, learning studios and training rooms, adding castors to provide extra flexibility and quick reconfiguration.

Stay Social

Social spaces come to life with Everywhere Tables, for instant conversation and relaxation. Single column bases on coffee, café and standing height tables bring variety to cafés and social spaces. Larger tables encourage impromptu gatherings for a mix of people.

Pair a sophisticated veneer top with a polished base for a premium finish. Or place a laminate with a warm and velvety texture alongside a painted base for a contemporary look.

Details and Features

Power and access options

Café and occasional tables

Tables to support collaboration from standing height to conference tables

Training tables including trapezoid shapes with castors

About Dan Grabowski

Grand Rapids, Michigan designer Dan Grabowski grew up understanding the importance of problem-solving. “When my dad needed to create or repair something, he would design a solution and then we would go off together and build it,” he recalls. “We built everything from cabinets to apartment buildings. That’s how things were done in our house.”
